

PLT Process Engineering Technician

Your tasks

The Process Engineering Technician will:

Ensures that processes related to CM management are evaluated, analysis conducted, and results reported.

1. Follow up on focus compounds that are showing higher-than-expected generation.
2. Check sequence and ensure follow up with operators for high-CM risk compounds.
3. Collect, record data and perform actions according to supervisor's direction.
4. Audit mixers running CM (consumption according to recipe)
5. Ensure weight being thrown on belt in relation to CM consumption is according to expectations.
6. Bulk area management: Direct the DWE truckers to make skids for critical compounds accessible
7. Direct truckers to take critical CM compounds to 2nd floor (Z lift or mixing elevator). Coordinate with CM truckers in Mixing room.
8. Close cooperation with Sequencing and Mixing supervision to ensure FEFO of CM as much as possible for production runs.
9. Get input from Cycle counter where appropriate.
10. Check age of CM in front of mixer to ensure consumption of old material.
11. Ensure documentation of shift-handover including critical topics per shift.
12. Ability to drive fork trucks (is preferred).
13. Ensure all ESH procedures, policies and legal requirements are implemented and monitored.

NOTE: May not be inclusive of all work required and may be updated as needed.
