

Production and Product Industrializing Engineer

Descrição da função

Supports new product introduction and production support engineering for a specific product or group of products after transfer from design to in-house or outsourced production. Interfaces with design, process, test, reliability and manufacturing engineering to solve product issues and production problems.

Develops and sustains process improvements to reduce production costs and increase yields. Coordinate and control all production activities in order to meet budget and production targets (e.g. maximize quality and capacity utilization, reduce cost and lead time).

HOW WILL YOU MAKE AN IMPACT?

- Provide production technical support, quality testing reviews, and troubleshooting of production technical problems.
- Coordinate processing, technical, and quality activities of the department.
- Responsible for accessing and processing rubber technology -- pursuing cost reductions for current products and processes, maintaining quality standards, and providing technical and decision-making support to the operators on the factory floor.
- Providing technical customer service; communication with the customer in connection with all technical questions concerning curing and vulcanization.
- Introduce, develop, and look after the recipes to ensure meeting the customer requirements.
- Responsible for the disposition of non-conforming material according to standards.
- Sets up experimental laboratory and factory evaluation trials in product and process areas.
- Maintains technical and quality status reporting requirements.
- Serves as a source of chemical awareness and compliance.
- Contribute to strategic and operative planning of the operations unit (e.g., with respect to investments, health and safety, quality and capacity)
- Resolves technical problems that arise with stocks, materials, and equipment
- Assist in product release strategy and product return process.
- Focused efforts on driving/implementing new technology to eliminate factory stock processing problems and implement Poke Yoke methods.
- Provides technical support for equipment design and new or improved processing equipment.
- Uses analytical troubleshooting techniques in problem-solving activities.
- Maintain and improve Quality systems to meet ISO:9001-2015 and internal standards
- Participate in Internal/External Quality audits.

- Ensure Processing/Quality performance (KPI) monitoring and reporting (e.g., regarding waste, customer complaints, etc.) in cooperation with plant controlling and production.
-

Requisitos

WHAT YOU BRING TO THE ROLE:

- Bachelor's degree in engineering: Chemical Engineering, Manufacturing Engineering, Mechanical Engineering, or related technical discipline
- Internships in a related field to production/process support.
- Strong problem-solving skills
- Troubleshooting manufacturing processes
- Good writing and verbal communication skills
- Good MS Office skills and other engineering software

Legal authorization to work in the U.S. is required. We will not sponsor individuals for employment visas now or in the future for this job posting.

ADDITIONAL WAYS TO STAND OUT:

- Cross-functional experience e.g. in engineering, quality, supply chain or CBS preferred
- Comprehensive experience in Rubber and or Plastic production processes
- Troubleshooting rubber and processing issues
- SAP experience (S4Hanna)
- Experience in working with international teams on production topics and understanding foreign culture
- 2+ years in a manufacturing environment supporting product introductions, equipment installation, and production/process support.
