

Tire Development Engineer - Original Equipment - Passenger Tires

Tus actividades

HOW YOU WILL MAKE AN IMPACT

SG10/11

We are seeking a detail-oriented and analytical Tire Development Engineer to join our Original Equipment (OE) Product Development Team (PDT) Platform in Auburn Hills, United States. In this role, you will be responsible for developing innovative tire solutions that meet the demanding requirements of original equipment car manufacturers. You will work collaboratively with cross-functional teams to design, test, and optimize tire performance while ensuring compliance with industry standards and customer specifications.

- Design and develop tire constructions and compounds using simulation software and engineering analysis tools
- Conduct comprehensive tire testing and validation to evaluate performance characteristics including durability, traction, rolling resistance, and noise
- Analyze test data and simulation results to identify optimization opportunities and drive continuous improvement
- Collaborate with materials scientists, manufacturing engineers, and quality assurance teams to ensure feasibility and manufacturability of tire designs
- Prepare detailed technical documentation, reports, and presentations for internal stakeholders and OE customers
- Troubleshoot performance issues and implement corrective actions to meet or exceed performance targets
- Stay current with automotive industry trends, regulatory requirements, and competitive tire technologies
- Participate in design reviews and provide technical recommendations throughout the product development lifecycle
- Support prototype development and coordinate with manufacturing facilities for production trials
- Manage project timelines and deliverables while maintaining organized documentation and records
