

## IT Process Quality & Rule Manager

หน้าที่ความรับผิดชอบในงานของคุณ

The IT Process Quality & Rule Manager is responsible for ensuring the quality, effectiveness, and compliance of the organization's IT processes. This role drives the development, implementation, and optimization of IT process governance, quality assurance, and documentation standards in alignment with industry frameworks and best practices.

The role also owns IT Communications, establishing and managing internal communication channels to ensure clarity, consistency, and engagement across the IT organization. Additionally, the role champions continuous improvement initiatives, including the identification and implementation of AI-driven solutions for process optimization.

### Key Responsibilities

- Develop, implement, and maintain IT processes and procedures aligned with industry standards and best practices.
- Guarantee the application of IT process, training, and functional documentation methodologies and standards.
- Drive the alignment and documentation of IT processes for the CT Quality Management System / Integrated Management System.
- Ensure IT process audit readiness for internal and external audits (e.g., ISO, TISAX).
- Support Competence Centers and regions in evaluating and designing data-driven process improvement measures.
- Optimize IT onboarding and offboarding processes, including digital workplace readiness.
- Manage official IT communications, including newsletters, Teams channels, IT intranet, and other internal communication presences.
- Identify and implement AI solutions for process quality, documentation automation, and compliance analysis.
