

Business Intelligence Developer

Vos activités

We are looking for a Business Intelligence Developer with around 3+ years of experience in BI and analytics to support the design, development, and operation of Power BI-based BI solutions.

The role focuses on hands-on development, requirement analysis, and collaboration within a broader BI team. The position involves contributing to AI-enabled dashboards and insights, including the use of Copilot in Power BI, while working under established governance, standards, and architectural guidance.

Key Responsibilities

BI Development & Delivery

- Support the gathering and analysis of business requirements for BI and reporting use cases.
- Contribute to technical specifications and solution designs for BI applications.
- Develop, enhance, and maintain Power BI reports and dashboards, including:
 - Data models and datasets
 - DAX measures
 - Report performance optimization
- Build and refine AI-supported dashboards leveraging Copilot in Power BI, under guidance from senior team members.

Collaboration & Project Support

- Work collaboratively with senior BI developers, data engineers, and business stakeholders.
- Contribute to BI delivery tasks within project-driven initiatives.
- Support testing, validation, and rollout of BI solutions.

Operations & Continuous Improvement

- Support operational tasks, including bug fixes, minor enhancements, and report adjustments.
- Contribute to change implementations and documentation updates.
- Help identify opportunities to improve usability, performance, and clarity of existing BI solutions.

Governance, Quality & Knowledge Sharing

- Follow established BI governance, data quality, and security standards.
- Contribute to documentation, reusable components, and best practices.
- Actively participate in knowledge sharing and learning initiatives within the BI community.

Votre profil

Required Experience & Qualifications

- 3+ years of experience in Business Intelligence, Data Analytics, or Reporting.
- Practical experience with Power BI (Desktop & Service).
- Solid knowledge of:
 - Data modeling fundamentals
 - DAX basics and intermediate calculations
 - SQL for data analysis
- Experience working with structured data from enterprise systems.
- Very good English (spoken and written).

Required Skills

Technical Skills

- Power BI report and dashboard development
- DAX (intermediate level)
- Data modeling concepts (facts, dimensions)
- SQL (good working knowledge)
- Basic understanding of AI-assisted BI capabilities (e.g. Copilot in Power BI)

Professional Skills

- Analytical mindset with attention to detail
- Willingness to learn and grow in a complex BI environment
- Ability to collaborate effectively within a team
- Clear communication with technical and non-technical stakeholders
