

# Internship - Infrastructure Application Management - CTBC

หน้าที่ความรับผิดชอบในงานของคุณ

As an **Infrastructure Application Management Intern**, you will support the team responsible for managing and optimizing the infrastructure application landscape. This role is designed for students who want hands-on exposure to enterprise IT environments, application lifecycle management, documentation, and process improvement, while working closely with experienced application managers.

The internship focuses on **learning by doing**, with clear guidance and structured tasks aligned with real business processes.

## Key Responsibilities

### Application Portfolio Support

- Support the maintenance of the application portfolio by collecting, updating, and validating application-related data (e.g. owners, usage, lifecycle status).
- Assist in basic analysis of applications to support standardization, consolidation, or optimization initiatives.
- Help ensure clear ownership and up-to-date records for infrastructure applications supported by the team.
- Support license tracking activities by gathering and validating usage-related information.

### Process Improvement & Documentation

- Assist in identifying gaps or inefficiencies in application management processes.
- Support the creation and maintenance of process documentation, workflows, and guidelines.
- Update documentation following changes in applications, processes, or tools.
- Assist in troubleshooting data or documentation inconsistencies and escalate when needed.

### Technical Collaboration & Support

- Collaborate with technical and non-technical stakeholders to support application-related activities.
- Assist the team in preparing information required for software deployment or operational activities.
- Work closely with IT Operations teams to better understand how infrastructure applications are deployed and supported.

### Change Management Support

- Support change management activities in line with ITIL principles.
- Assist with documenting change requests and tracking their status.
- Help assess the impact of minor application changes under

supervision.

#### Automated Workflows & Administration

- Support the identification of manual activities that could be automated.
- Assist with testing, documenting, and updating automated workflows.
- Help with administrative tasks related to application management tools and platforms.

#### โปรไฟล์ของคุณ

##### Qualifications (Internship Level)

- Currently enrolled in a **Bachelor's degree** in Computer Science, Information Technology, or a related field.
- Interest in Infrastructure, Application Management, or IT Operations.
- Basic understanding of IT concepts (applications, systems, environments).
- Familiarity with **Microsoft Office tools**, especially Excel (data lists, basic analysis).
- Willingness to learn about **ITIL principles, change management, and Agile ways of working.**
- Good organizational skills and attention to detail.
- Ability to work independently on assigned tasks, with guidance when needed.
- Strong collaboration skills and openness to feedback.
- Fluent in English (written and spoken)
