

PLT Production Coordinator

Your tasks

The PLT Production Coordinator will:

Be responsible for the generation of a sequence that ultimately leads to maximum throughput and is executable by Production. In addition to the creation of efficient supply machine schedules, a primary responsibility is shop floor coordination with production to insure that bottleneck issues are resolved in a proactive manner. Daily reporting of goals versus results is expected.

1. Write and make available machine schedules to shop floor.
2. Provide build out tracking information to area of responsibility.
3. Understand plant constraints (build rates, machine rates, etc.) and apply that knowledge to the weekly schedule. Maintain planning database to manage these constraints.
4. Minimize the number of changeovers if it does not negatively affect throughput.
5. Monitor and report shift performance to plan.
6. Communicate production schedule and schedule changes.
7. Manage the work in process inventory thru better scheduling.
8. Work with the production to ensure correct requirements are being ordered.
9. Follow all plant policies, environmental policies, and plant and departmental safety policies.
10. Perform special projects as assigned by the Sequencing Manager.
11. Ensure all ESH procedures, policies and legal requirements are implemented and monitored.

NOTE: May not be inclusive of all work required and may be updated as needed.
