

Digital Services Engineer

หน้าที่ความรับผิดชอบในงานของคุณ

The Digital Services Engineer is responsible for designing, developing, and maintaining robust digital service solutions that enhance the organization's technological capabilities. This role collaborates with cross-functional teams to deliver efficient, scalable, and secure services while adhering to industry best practices and standards.

HOW YOU WILL MAKE AN IMPACT

- Design and develop digital service solutions using modern programming languages and frameworks
- Analyze technical requirements and translate them into efficient, organized system architectures
- Develop and maintain APIs and web services that integrate seamlessly with existing systems
- Troubleshoot, diagnose, and resolve technical issues with precision and attention to detail
- Implement and optimize database solutions to ensure reliable data management
- Collaborate with product managers, architects, and other engineers to deliver high-quality solutions
- Conduct thorough testing and quality assurance to ensure code meets organizational standards
- Monitor system performance, identify bottlenecks, and implement optimization strategies
- Document technical specifications, processes, and solutions in a clear and organized manner
- Participate in code reviews and contribute to continuous improvement of development practices
- Support deployment activities and ensure smooth integration of new services into production environments
- Stay current with emerging technologies and industry best practices in digital services

โปรไฟล์ของคุณ
