

DEVELOPMENT ENGINEER

Your tasks

Key Responsibilities:

- Lead complex Product industrialization related projects focused on: Platform industrialization, Efficiency, RnD plant collaboration.
- Lead and oversee complex tire transfer projects between production plants, ensuring seamless execution while maintaining alignment with local toolbox requirements and consolidation partner objectives
- Direct the planning and validation of experimental tire orders (ETO) in close collaboration with plant operations, establishing quality benchmarks and driving corrective actions for any deviations
- Implementation of Release Notes (RN), ensuring accurate product release and adherence to Start of Production (SOP) timelines across all stakeholder groups
- Drive continuous process optimization initiatives to enhance the efficiency and reliability of product transfer operations
- Direct cross-functional collaboration with Quality Management, Production, and Product Industrialization teams to translate improvement guidelines into measurable operational outcomes

Quality Assurance & Continuous Improvement

- Own quality goal realization and lead quality optimization initiatives that drive measurable improvements in product and production performance
- Mentor and guide team members in quality standards and process compliance, fostering a culture of excellence and accountability
- Serve as a trusted consultant on tire layout and technical specifications, providing strategic guidance to support organizational objectives

Your profile

- min. Bachelor's degree in Engineering, Chemistry, Materials Science, or related technical field
- Fluent English proficiency (written and verbal)
- Proven ability to thrive in cross-functional, multicultural teams and collaborative environments
- Strong analytical and innovative problem-solving mindset with a data-driven approach
- Demonstrated passion for quality excellence and continuous improvement
- Self-motivated, organized, and proactive in managing complex projects independently
- Adaptable and agile mindset with comfort navigating ambiguity and change
- Proficiency with digital collaboration tools and modern project
