

DEVELOPMENT ENGINEER - Deputy role for maternal leave period

工作职责

Key Responsibilities:

Strategic Project Leadership - Tire Transfer Initiatives

- Lead and oversee complex tire transfer projects between production plants, ensuring seamless execution while maintaining alignment with local toolbox requirements and consolidation partner objectives
- Direct the planning and validation of experimental tire orders (ETO) in close collaboration with plant operations, establishing quality benchmarks and driving corrective actions for any deviations
- Champion the implementation of Release Notices (RN) protocols, ensuring accurate product release and adherence to Start of Production (SOP) timelines across all stakeholder groups
- Drive continuous process optimization initiatives to enhance the efficiency and reliability of product transfer operations

Technology Implementation & Process Excellence

- Lead Value Leadership (VL) project execution and spearhead PI Process optimization efforts, positioning the organization at the forefront of product and process innovation
- Direct cross-functional collaboration with Quality Management, Production, and Product Industrialization teams to translate improvement guidelines into measurable operational outcomes
- Establish and maintain best-in-class process-oriented management systems (PoMS), serving as the subject matter expert and advocate for process discipline across the organization

Quality Assurance & Continuous Improvement

- Own quality goal realization and lead quality optimization initiatives that drive measurable improvements in product and production performance
- Mentor and guide team members in quality standards and process compliance, fostering a culture of excellence and accountability
- Serve as a trusted consultant on tire layout and technical specifications, providing strategic guidance to support organizational objectives

职位要求
