SAP CO IT Consultant

Feladatok

As SAP CO IT Consultant, you will have these key responsibilities:

- Support the Controlling (CO) workstream across all phases of our S/4HANA template build and rollout, from design through hypercare;
- Contribute to Fit-to-Template workshops, clarify requirements, and translate business needs into functional specifications;
- Support configuration of core CO areas - Overhead Cost Controlling (Cost Center Accounting, Internal Orders), Product Cost Controlling (Product Cost Planning, Cost Object Controlling), and Profitability Analysis (account-based CO-PA / Margin Analysis and costing-based CO-PA) - in line with the S/4HANA standard and the global template design;
- Leverage the S/4HANA Universal Journal (ACDOCA) and real-time FI-CO integration to ensure a single, reconciled source of truth across Finance and Controlling;
- Support Project System (PS) and Investment Management (IM) topics where they interface with Controlling,
- Safeguard the integration and process consistency of CO with FI, MM, SD, and PP, and help clarify cross-functional dependencies;
- Coordinate CO deliverables, timelines, and system readiness within the workstream;
- Prepare and execute CO test scenarios (unit, integration, UAT), and drive defect analysis and resolution;
- Support migration of CO master and transactional data, validate data consistency (e.g. balances, allocations, master-data structures), and assist reconciliation between legacy and S/4HANA systems;
- Guide business and key users during rollout and hypercare and help resolve CO-related incidents. Identify improvement opportunities and contribute to process optimization.

Profilja

- Academic Degree in Business Administration, Finance, Information Systems or comparable field;
- 5+ years experience in SAP CO or Finance-related IT roles, ideally including at least one SAP implementation, rollout, or S/4HANA transformation project;
- In-depth knowledge of SAP S/4HANA Controlling (CO), including Profitability Analysis - both account-based CO-PA (Margin Analysis) and costing-based CO-PA - and Product Cost Controlling (Product Cost Planning); working knowledge of the Material Ledger; solid working knowledge of Project System (PS), Investment Management (IM), and the connected modules FI, PP, MM, and SD.
- Sound understanding of the S/4HANA Finance architecture, in particular the Universal Journal (ACDOCA), the merged FI-CO data model, and real-time integration;
- Familiarity with the relevant SAP Fiori applications for Controlling;
