

Head of Industrial Engineering - Tires

Vaše náplň práce

Join our team as an **Industrial Engineering Manager** and help drive efficiency, productivity, and continuous improvement across our manufacturing operations through effective planning, process optimization, and data-driven decision-making.

Key Responsibilities:

- Ensure the employment of efficient IE methods for cost improvement in production according to default targets, in line with the allowed budget and with consideration to quality, cost, quantity and date targets;
- Analyze, evaluate and realize the optimal function for fulfilling the work tasks according to the employee machine relationship with consideration to social, economical and ecological basic conditions;
- Ensure process, plan and standardize times in collaboration with production and other departments for creating wage and performance systems;
- Decide on changes and introduction of work organizations and layouts and their effects on wages and performance systems;
- Ensure the availability of IE data, guidelines and factory agreement to the management;
- Ensure and fix middle and long-term personnel planning including the product calculation in collaboration with the production and controlling department;
- Develop a yearly production plan (daily, monthly) in consideration with seasonal effects (market requirements, holiday plans) in collaboration with sequencing, scheduling, management;
- Develop production plans in collaboration with process control and the Production department.
- Provide IE data for economic feasibility studies, budget planning and strategic concepts;
- Ensure future development of processes and material handling in collaboration with the Production department;
- Ensure the analysis and reporting of process comparison, capacity reports and benchmark projects to the management.
