

Working Student - Digitalization Customer Requirements & Quality Processes for Quality Management (m/f/d) - REF98154H

Vaše náplň práce

The Quality Management & Technical Compliance Tires department at the **Hannover Stöcken** site is responsible for ensuring the quality of all products within the Tire Division, which are developed and produced based on customer requirements and global system guidelines. Our mission: to plan, control and continuously improve quality - using professional quality management methods that we apply in a systematic and globally comparable way.

For you as our new **working student (m/f/diverse)**, this means gaining insights into a highly relevant field of work, learning methods that are sought after in many future career paths, and taking on tasks where accuracy, structured working methods and the application of lessons learned play a central role.

You would be starting to support us in **september 2026** and the position comes with a working time of **20 hours per week**. You'll work primarily **on site** so you can learn and collaborate directly with the team. Remote work is possible occasionally.

Your Tasks - varied, responsible and international

Support the digitalization and structuring of Customer Requirements within Quality Management by transforming unstructured customer documents into structured, traceable, and reportable digital data using Microsoft tools (Power Apps, Power Automate, Microsoft Lists, Power BI and SmartProcess).

The role contributes to increased transparency, efficiency, and audit-readiness of customer requirements handling.

• CSR (Customer Specific Requirements):

- Structure customer requirement documents (PDF, Word, Excel)
- Transfer requirements into digital tools (Microsoft Lists, Power Apps)
- Support classification (e.g. system, process, product requirements)

• Power Platform Support:

- Maintain and populate Microsoft Lists used for requirements management
- Support Power Apps solutions used to manage and visualize requirements
- Assist in Power Automate flows (e.g. notifications, approvals, updates)

• Reporting & Data Analysis:

- Build and maintain Power BI reports based on Microsoft Lists and SharePoint data
