

Service Center Supply Chain Planning Analyst

Jūsų užduotys

The Service Center Supply Chain Planning (SCP) Analyst is responsible for standardized back-office support for Supply Management Americas through recurring analytics and structured process execution. The role supports reliable service delivery and increased business continuity by taking over documented, repeatable activities while decision-making, prioritization and stakeholder communication remain with Supply Management Americas Ft. Mill.

The position may also support adjacent supply chain functions based on business needs and service catalog maturity.

Key Responsibilities

Dashboarding & reporting

- Maintain & refresh dashboard applications
- Troubleshoot any data flow issues leading to dashboard refresh errors
- Perform punch list improvements

Master Data Support

- Support maintenance of systems to enable reliable planning outputs
- Execute Standardized data checks through predefined criteria
- Maintain planning parameters according to documented procedures
- Escalate parameter exceptions for further troubleshooting & decision

Routine analytics

- Maintain Supply Management scorecard
- Refresh backorder report
- Run documented un-confirmation checklists and escalate exceptions
- Ensure timely and consistent delivery of other routine analytics as directed

Service Delivery Execution

- Execute assigned recurring activities according to documented procedures
- Monitor completion of scheduled tasks and reports
- Escalate exceptions outside documented procedures

Standardization & Process Improvement

- Identify repetitive manual activities
- Support process cleanup & standardization
- Contribute to reporting improvement activities for recurring tasks
