Motion Full Stack Developer & Technical Consultant (m/f/d)

Your tasks

Do you enjoy combining software development with business consulting and application ownership? We are looking for a Motion Full Stack Developer & Technical Consultant to take ownership of the Tech Library application. In this role, you will drive application support, development, and continuous improvement while acting as the primary expert and advisor for users and stakeholders. You'll work closely with business teams to enhance application capabilities, deliver new features, and help shape future development opportunities.

You'll be responsible for ...

• Support, maintain, and continuously improve the Tech Library application.

• Develop and implement new features, enhancements, and bug fixes.

• Monitor application performance and resolve operational issues.

• Manage application releases, testing, and maintenance activities.

• Collaborate with users to gather requirements and translate them into technical solutions.

• Support application integrations and configuration activities.

• Act as the main point of contact and technical expert for Tech Library-related topics.

• Provide consulting and guidance on application capabilities, best practices, and future enhancements.

• Maintain documentation and knowledge-sharing materials.

• Contribute to business initiatives and projects involving the Tech Library application.

Your profile

• Degree in Computer Science, Information Technology, or a related field.

• Experience in software development, application support, or technical consulting.

• Strong programming skills in Java Spring (backend) and JavaScript (frontend).

• Experience with application operations, testing, release management, and troubleshooting.
