

Junior Data Engineer (BI Developer)

Your tasks

You are a technology enthusiast? Are you customer-oriented? You are passionate about Business Intelligence? And you like to work with cutting-edge, cloud-based analytic solutions? Then we have the right offer for you: A challenging IT career as **Junior Data Engineer**.

We are ContiTrade, the fast-moving and agile trade organization of Continental. With over 1500 own branches and franchise partners we offer high quality products and car services across EMEA.

What awaits you?

As a **Junior Data Engineer**, you will help shape and operate our cloud-based Business Intelligence and Data Platform, using services such as Azure Databricks, Azure Data Factory and SQL Server. Working closely with solution architects, product owners, report developers, and business stakeholders, you will build reliable data pipelines, deliver high-quality reporting models, and enable data-driven decision-making across the organization. This role offers an excellent opportunity to grow your expertise in Azure-based data engineering while contributing to modern analytics solutions.

Your responsibilities

- Translate business reporting requirements into technical solutions
- Develop and maintain Azure-based data pipelines and integrations
- Implement data transformations and build analytical data models
- Ensure data quality through testing, monitoring, and optimization
- Collaborate with business stakeholders to deliver impactful BI solutions
- Document technical implementations and data processes
- Support platform operations, enhancements, and upgrades
- Contribute to incident, change, and service management activities

Your profile

To succeed in this role you'd need:

- Degree in Computer Science, Data Engineering, Information Systems, or comparable background
- 0-2 years experience in data engineering or data analytics
- Experience in working with virtual and international teams, fluency in written/spoken English
