Intelligent Automation & AI Specialist

Feladatok

Continental is seeking an Intelligent Automation & AI Developer to join the Americas Intelligent Automation Center of Excellence (CoE). In this role, you will work alongside experienced automation and AI professionals to develop, implement, and support innovative automation solutions that improve business processes and drive digital transformation across the organization.

This position offers a unique opportunity to gain hands-on experience with Robotic Process Automation (RPA), Artificial Intelligence (AI), Generative AI, and emerging Agentic AI technologies while supporting projects that deliver measurable business value.

Core Responsibilities

- Develop, test, deploy, and support automation solutions using approved automation and AI technologies.
- Collaborate with business stakeholders and project teams to understand business requirements and identify automation opportunities.
- Assist in the development of AI-enabled business solutions, including intelligent document processing, generative AI use cases, and workflow automation.
- Create and maintain technical documentation for automation solutions and development standards.
- Participate in testing, validation, troubleshooting, and continuous improvement activities.
- Support solution monitoring and production support activities for deployed automations.
- Contribute to the development of reusable automation components and best practices.
- Participate in technical training programs focused on intelligent automation, AI, and emerging technologies.
- Work closely with senior developers and technical leads to build technical expertise and broaden automation capabilities.
- Support the CoE in evaluating new tools, technologies, and automation approaches.

Profilja

Required Qualifications

- Bachelor's degree in Computer Science, Information Technology, Engineering, Data Analytics, or a related field.
- 1-3 years of experience in software development, automation, data analytics, or related technical roles.
